- Off-network roaming**
- No coverage**

Coverage updated on: 11/29/12

This tool provides high-level estimates of our wireless coverage. Coverage is not available everywhere and varies based on a number of factors. [>> Learn more](#)

Our coverage maps provide high-level estimates of our coverage areas when using your device outdoors under optimal conditions. Coverage isn't available everywhere. Estimating wireless coverage and signal strength is not an exact science.

There are gaps in coverage within our estimated coverage areas that, along with other factors both within and beyond our control (network problems, software, signal strength, your wireless device, structures, buildings, weather, geography, topography, etc.), will result in dropped and blocked connections, slower data speeds, or otherwise impact the quality of services.

Services that rely on location information, such as E911 and GPS navigation, depend on your device's ability to acquire satellite signals (typically not available indoors) and network coverage. E911 services also depend on local emergency service provider systems/support. Estimated future coverage subject to change.

THE ONLY NETWORK WITH TRULY UNLIMITED DATASM

Sprint is the only national carrier with no throttling, no metering and no overages, all while on the Sprint network.
